**Techno  
India  
Group**

A Satyam Roychowdhury initiative

Harnessing technology, enriching lives

The journey of Techno India Group began more than three decades ago. In the backdrop of a dearth of private engineering colleges in West Bengal at that time, the State witnessed a brain drain of meritorious students for higher technical studies. At this juncture educational entrepreneurs GoutamRoychowdhury and Satyam Roychowdhury decided to start a computer training centre. They took the initiative to open computer centres at government-sponsored colleges jointly with the Institute of Computer Engineers, India (ICE [I]). The determination to edify evolved into a giant leap in revolutionising digital literacy in Bengal. Techno India Group was thus established in 1985 with the ambition of developing educational institutes in West Bengal.

It began its courses with Science and Engineering, and gradually expndedto Management, Medicine, and other key technology courses like Information and Communication, Genetics, Biotechnology, Food technology, Architecture, Biomedical, Paramedical Sciences, Sports, Management Studies and Media Science. The vision to spread education at micro and macro levels has been an unstoppable endeavour.

Over the last three decades, the group has ventured into multifaceted sectors and newer horizons. Being the largest educational conglomerate of Eastern India, Techno India Group has already earned a commendable credibility in the society at large.

Techno India Group has expanded its wings from the fields of Science, Technology and Management Studies to Health Care, Hospitality, Sports, Entertainment, Newspaper, Advertising and Tourism.

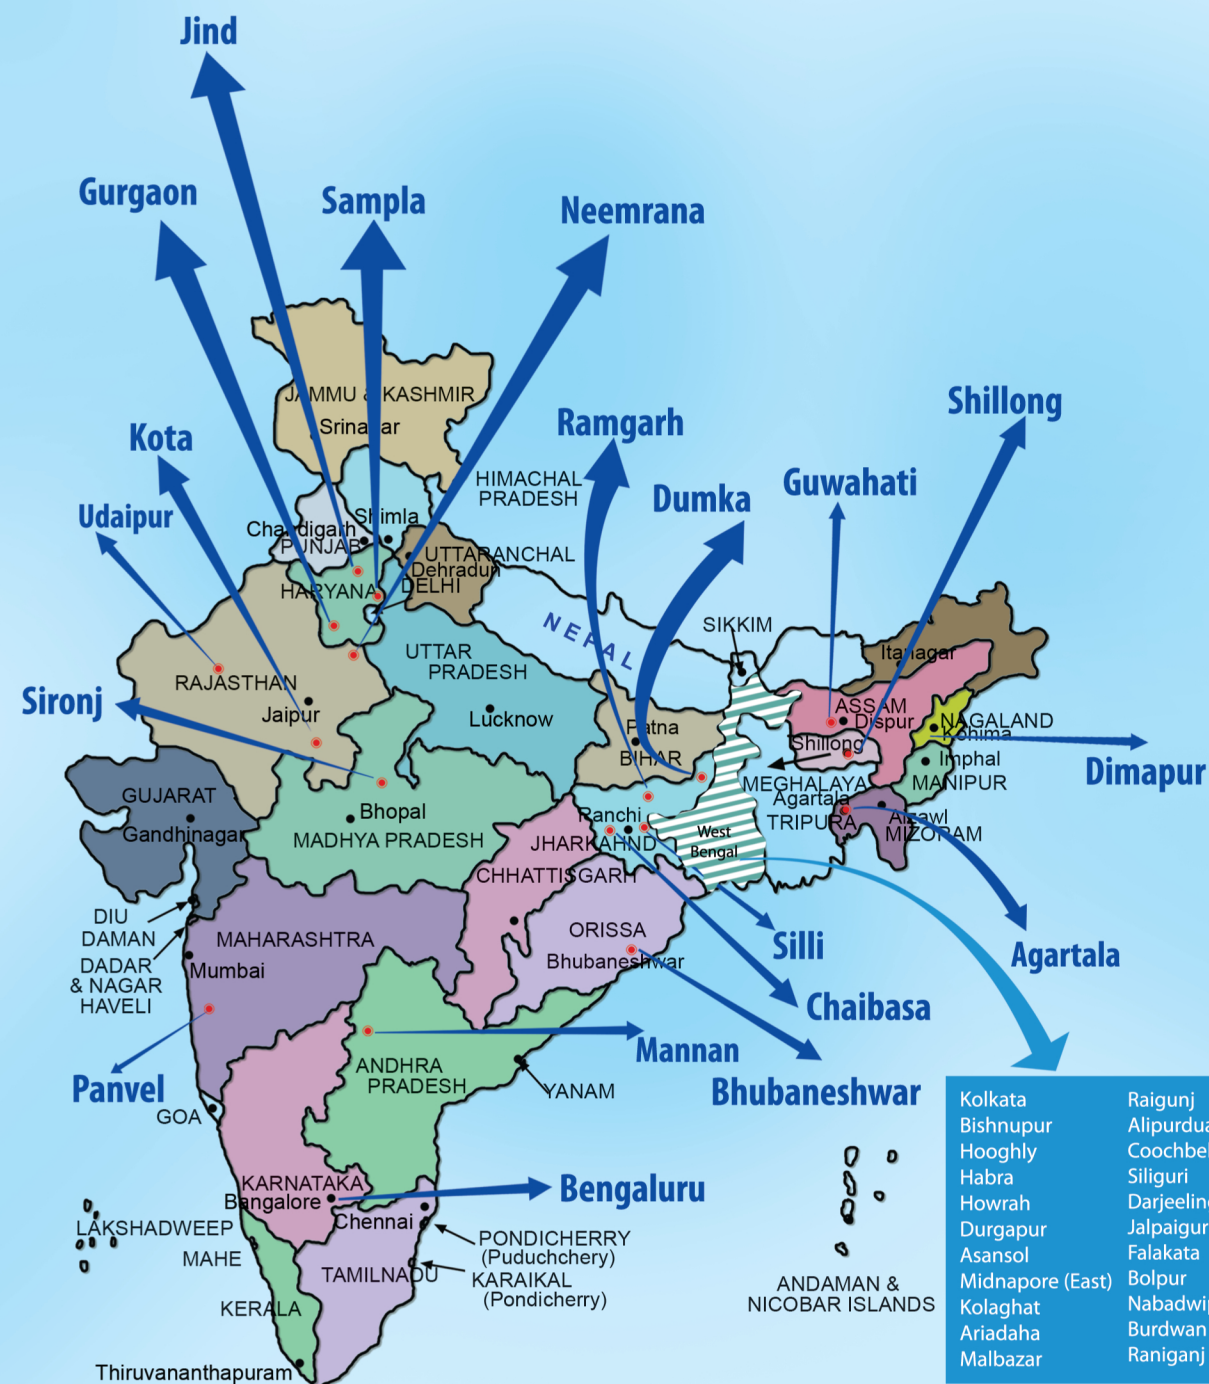

## Vision

- Impart knowledge driven education of the highest quality.
- Create the best infrastructure and allied facilities to foster research, product development and industrial consultancy.
- Build one of the best Industry-Academia interface to leverage the best collaborative output in terms of recruitment, industrial training, research and consultancy.

## Mission

To create a flow of quality human resource that is capable of meeting the technological challenges of tomorrow and thereby create wealth for the nation at the forefront of knowledge.

# TIG's presence across India

A Satyam Roychowdhury initiative

## TIG at a Glance

32 Years of Excellence in Knowledge Management

4 Universities

21 Engineering Colleges

12 B-Schools

40 IT Training Institutes

22 R & D Labs

19 Public Schools

7 HS Schools

100 state-of-the-art Campuses in India & Overseas

6,000 Faculty & Staff members

150 thousands student base

1 million alumni across the world

Knowledge Cities

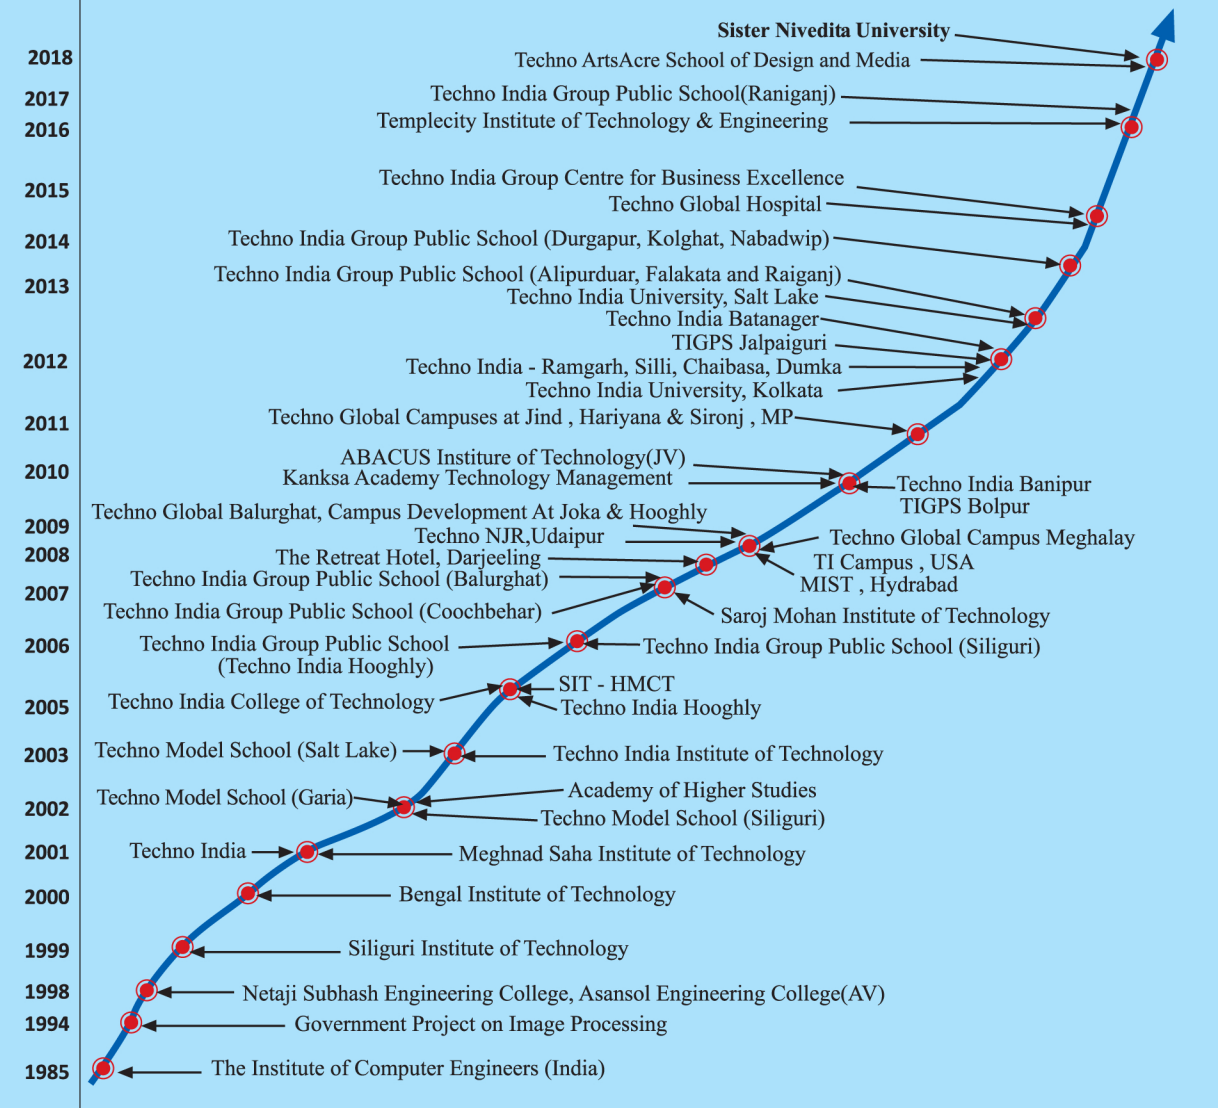

Sports Academies in West Bengal, North-Eastern States

Multi Speciality Hospitals

Luxury Hotel in Darjeeling

Newspaper, Publishing and Advertising

## A journey since 1985...

Chancellor, Sister Nivedita University  
Co-founder & Managing Director, Techno India Group

### Message from the Desk of

Chancellor, Sister Nivedita University  
Founder & Managing Director, Techno India Group

It's been more than three decades for Techno India Group in the education industry, and it all began with our determination to edify. Our determination evolved into a giant leap in revolutionising digital literacy in Bengal. From initial computer training centres we ventured into higher education in Science and Engineering, and gradually expanded into Management Sciences and other key technology courses. We inspire students to learn not only to make a career but to enrich their minds with thoughts and wisdom of knowledge which would reform their lives. We concentrate on providing students academic courses focusing on contemporary needs. The students here have the scope of interacting with technical heads and management gurus, who guide them to grow and nurture his/her self to become a distinguished individual. Here we offer students with immense opportunities to learn, not only inside the classroom but outside as well. Over the last three decades, the group has become the largest educational conglomerate in Eastern India, and has ventured into multifaceted sectors and newer horizons like hospitality, media and healthcare.

Sister Nivedita University, the latest venture of Techno India Group has been built on the path of Sister Nivedita, blessed under the shadow of Swami Vivekananda. The university pledges to provide a holistic approach to education, where we focus not only on the material success of our students, but also on their spiritual and overall well-being. It is a dynamic organization with a primary focus on reaching excellence in research oriented education. As a group, we sincerely believe that India's comparative advantage in the global economy lies in education and its assimilation with the globalization process has challenged us to offer programmes in tune with the current changing needs of the society. SNU is aimed at bridging the industry-academia gap by developing a unique model to integrate the emerging skill-based trainings and empowerment of women into the academic cycle.

I dream of nurturing talents from every domain and prepare them to compete in the global arena.

**Satyam Roychowdhury**
